

Order Tracking Option

The SMS Turbo Order Tracking option is one of the most powerful tools we have to offer. Many of your customers want to set up jobs and have their transactions tracked and invoiced by that job. Special jobs deserve special pricing and the Order Tracking option gives you complete control over pricing. The Order Tracking option also allows you to set up special price sheets for your customer's even when they are not using an Order. There is no longer a need to flip thru a "rate book" during the ticketing process. This can also save you hours when it is time to change product pricing.

Key Benefits

- ▶ Set up Customer Orders and jobs.
- ▶ Set limits and restrictions per Order.
- ▶ Generate Quotes and convert them to Orders.
- ▶ Set up special pricing based on Customers and Orders
- ▶ Invoice based on Orders*
- ▶ Set Terms by Order
- ▶ User Defined Fields

Order Tracking lets you meet your customer's needs.

*The SMS Turbo Order Tracking option works in conjunction with other options. In order to invoice based on Orders the SMS Turbo Billing option or an Accounting Interface is required. Please contact your CIS sales person for details.
